

CONTENTS OF VOLUME 98

Number 1, January 2007

Hirokazu Yanagihara. A family of estimators for multivariate kurtosis in a nonnormal linear regression model	1
F. Mallor, E. Omeý and J. Santos. Multivariate weighted renewal functions	30
Fang Yao. Asymptotic distributions of nonparametric regression estimators for longitudinal or functional data	40
Hajo Holzmann, Nicolai Bissantz and Axel Munk. Density testing in a contaminated sample	57
Z.D. Bai, Baiqi Miao and Baisuo Jin. On limit theorem for the eigenvalues of product of two random matrices	76
Jorge Navarro and Tomasz Rychlik. Reliability and expectation bounds for coherent systems with exchangeable components	102
Christian Francq and Jean-Michel Zakořan. HAC estimation and strong linearity testing in weak ARMA models	114
Alexei R. Pankov and Konstantin V. Siemenikhin. Minimax estimation for singular linear multivariate models with mixed uncertainty	145
H. De Meyer, B. De Baets and B. De Schuymer. On the transitivity of the comonotonic and countermonotonic comparison of random variables	177
Lyle Noakes. Geometry and marginals.	194
Vygantas Paulauskas. On unit roots for spatial autoregressive models . .	209

Number 2, February 2007

Reinhard Furrer and Thomas Bengtsson. Estimation of high-dimensional prior and posterior covariance matrices in Kalman filter variants	227
Fred W. Huffer and Cheolyong Park. A test for elliptical symmetry	256
Enkelejd Hashorva. Conditional limiting distribution of Type III elliptical random vectors	282
Yoshihiko Konno. Estimation of normal covariance matrices parametrized by irreducible symmetric cones under Stein's loss	295
Wai-Cheung Ip, Mi-Xia Wu, Song-Gui Wang and Heung Wong. Estimation for parameters of interest in random effects growth curve models	317
Nader Ebrahimi, S.N.U.A. Kirmani and Ehsan S. Soofi. Multivariate dynamic information	328

Peter Bubenik and John Holbrook. Densities for random balanced sampling	350
Linda Yuet-Yee Wong and Qiqing Yu. A bivariate interval censorship model for partnership formation	370
Ricardo Leiva. Linear discrimination with equicorrelated training vectors.	384
Hisayuki Hara and Akimichi Takemura. Improving on the maximum likelihood estimators of the means in Poisson decomposable graphical models.	410

Number 3, March 2007

Andrew L. Rukhin. Estimating common vector parameters in interlaboratory studies	435
Qihua Wang and Keming Yu. Likelihood-based kernel estimation in semiparametric errors-in-covariables models with validation data	455
Arthur Cohen and Harold B. Sackrowitz. More on the inadmissibility of step-up	481
Yu-Yun Ho and Sam Weerahandi. Analysis of repeated measures under unequal variances.	493
Aiyi Liu, Chengqing Wu, Kai F. Yu and Weishi Yuan. Completeness and unbiased estimation of mean vector in the multivariate group sequential case.	505
Barry James, Kang James and Yongcheng Qi. Limit distribution of the sum and maximum from multivariate Gaussian sequences	517
Olivier Scaillet. Kernel-based goodness-of-fit tests for copulas with fixed smoothing parameters.	533
Johanna Nešlehová. On rank correlation measures for non-continuous random variables	544
Mohsen Pourahmadi, Michael J. Daniels and Trevor Park. Simultaneous modelling of the Cholesky decomposition of several covariance matrices.	568
Sergiy Shklyar, Alexander Kukush, Ivan Markovsky and Sabine Van Huffel. On the conic section fitting problem	588
Patrick Lang, Ann Gironella and Rienk Venema. Properties of cyclic subspace regression.	625
Kenichiro Tamaki. Second order optimality for estimators in time series regression models	638

Number 4, April 2007

Peter J. Smith and Lee M. Garth. Distribution and characteristic functions for correlated complex Wishart matrices.	661
R. Brent Dozier and Jack W. Silverstein. On the empirical distribution of eigenvalues of large dimensional information-plus-noise-type matrices.	678
Tristan Mary-Huard, Stéphane Robin and Jean-Jacques Daudin. A penalized criterion for variable selection in classification	695
V.V. Anh, N.N. Leonenko and L.M. Sakhno. Statistical inference using higher-order information.	706
Songqiao Wen, Qingshu Lu and Taizhong Hu. Likelihood ratio orderings of spacings of heterogeneous exponential random variables	743
Jun Cai and Haijun Li. Dependence properties and bounds for ruin probabilities in multivariate compound risk models.	757
Frederic Picard. A multilinear form inequality	774
Marco A.R. Ferreira and Victor De Oliveira. Bayesian reference analysis for Gaussian Markov random fields.	789
Donald Robertson and James Symons. Maximum likelihood factor analysis with rank-deficient sample covariance matrices	813
Tatsuya Kubokawa and William E. Strawderman. On minimaxity and admissibility of hierarchical Bayes estimators	829
David J. Nott, Zeming Yu, Eva Chan, Chris Cotsapas, Mark J. Cowley, Jeremy Pulvers, Rohan Williams and Peter Little. Hierarchical Bayes variable selection and microarray experiments.	852

Number 5, May 2007

Marina Meilă. Comparing clusterings—an information based distance . .	873
Maengseok Noh and Youngjo Lee. REML estimation for binary data in GLMMs	896
Brenton R. Clarke and Andreas Futschik. On the convergence of Newton's method when estimating higher dimensional parameters . . .	916
Ming-Tien Tsai. Maximum likelihood estimation of Wishart mean matrices under Löwner order restrictions	932
Ming-Tien Tsai and Tatsuya Kubokawa. Estimation of Wishart mean matrices under simple tree ordering	945
José A. Díaz-García. A note about measures and Jacobians of singular random matrices	960
Li-Ping Zhu and Li-Xing Zhu. On kernel method for sliced average variance estimation.	970

Yoshihide Kakizawa. Moderate deviations for quadratic forms in Gaussian stationary processes	992
Guosheng Yin. Model checking for additive hazards model with multivariate survival data	1018
Rong-Tsorng Wang. A reliability model for multivariate exponential distributions.	1033
Jürgen Hansohm. Algorithms and error estimations for monotone regression on partially preordered sets	1043
Majid Mojirsheibani and Zahra Montazeri. On nonparametric classification with missing covariates.	1051
Michael Kohler and Adam Krzyżak. Asymptotic confidence intervals for Poisson regression	1072
Acknowledgement of Referees	1095

Number 6, July 2007

R. Brent Dozier and Jack W. Silverstein. Analysis of the limiting spectral distribution of large dimensional information-plus-noise type matrices.	1099
Friedrich Schmid and Rafael Schmidt. Multivariate conditional versions of Spearman's rho and related measures of tail dependence	1123
J. Davis and A. Mukherjee. Identification of parameters by the distribution of the minimum: The tri-variate normal case with negative correlations	1141
Ming-Tien Tsai and Pranab Kumar Sen. Locally best rotation-invariant rank tests for modal location.	1160
Xu-qing Liu and Jian-ying Rong. Nonnegative quadratic estimation and quadratic sufficiency in general linear models	1180
S. Alvarez-Andrade, N. Balakrishnan and L. Bordes. Homogeneity tests based on several progressively Type-II censored samples	1195
Zhengyan Lin and Degui Li. Asymptotic normality for L_1 -norm kernel estimator of conditional median under association dependence	1214
André Mas. Weak convergence in the functional autoregressive model	1231
Ke-Hai Yuan, Kentaro Hayashi and Peter M. Bentler. Normal theory likelihood ratio statistic for mean and covariance structure analysis under alternative hypotheses	1262
A. Ferrari, G. Letac and J.-Y. Tournet. Exponential families of mixed Poisson distributions.	1283

Zhenhai Yang, Kai-Tai Fang and Samuel Kotz. On the Student's t -distribution and the t -statistic	1293
Hsiaw-Chan Yeh. Three general multivariate semi-Pareto distributions and their characterizations	1305

Number 7, August 2007

J. Carlos Escanciano. Weak convergence of non-stationary multivariate marked processes with applications to martingale testing	1321
Jiexiang Li and Lanh Tat Tran. Hazard rate estimation on random fields	1337
Okyoung Na and Sangyeol Lee. Moving estimates test with time varying bandwidth	1356
Alessio Sancetta. Nonparametric estimation of distributions with given marginals via Bernstein–Kantorovich polynomials: L_1 and pointwise convergence theory	1376
